

THE BEST SERVICE PLAN IN TOWN!

<p>Precision Furnace Service Plan Benefits:</p>	<p>Precision Air-Conditioning Service Plan Benefits:</p>
<ul style="list-style-type: none"> ➤ Lower utility bills. ➤ Extended equipment life. ➤ Fewer repairs, breakdowns, and improved system reliability. ➤ Peace of mind for you and your family. ➤ Increased heating capacity. 	<ul style="list-style-type: none"> ➤ Lower utility bills by reducing energy consumption and waste. ➤ Extended equipment life. ➤ Peace of mind for you and your family. ➤ Fewer repairs, and improved system reliability. ➤ Increased cooling capacity and efficiency.
<p>Our Basic Service Plan Procedure Includes, As Needed:</p>	
<ol style="list-style-type: none"> 1 Inspect and tighten all electrical connections and terminals. 2 Clean, and adjust main gas burners. 3 Clean, and adjust ignition/pilot assembly. 4 Thoroughly brush and vacuum accessible portions of heat-exchanger(s) and combustion chambers. 5 Visually inspect heat-exchanger(s) & combustion chambers for cracks, rusting, or problem areas. 6 Vacuum out blower compartment; return airdrop, and surrounding area. (No duct cleaning) 7 Inspect the flue assembly and test flue gas drafting mechanism. 8 Test and inspect all furnace safety controls. 9 Replace or clean standard air filters. 10 Clean, level, and test thermostat. 11 Lubricate all fan motors and all moving parts. 12 Measure and record electrical voltage, amperage, and component resistance. 13 Inspect and test all system transformers, relays, contactors, and controls. Measure performance 14 Inspect and test thermocouple output as well as pilot safety switch. 15 Monitor refrigerant (Freon) pressures and temperatures. 16 Test system starting and running capacitors. 17 Inspect all cooling system electrical wires, connectors, and terminals. 18 Wash and level condensing unit for proper motor and bearing wear. 19 Clean and inspect evaporator coil and drain pan when readily accessible. 20 Test and record super-heat and sub-cooling. Compare with factory specifications. 	
<p>Our Gold Service Plan Procedure Includes, As Needed:</p>	
<ol style="list-style-type: none"> 21 Repair minor air leaks in plenum and return airdrop. 22 Chemically clean and thoroughly wash condenser coil(s). 23 Heat Exchanger integrity test 24 Test, record, and adjust gas pressure. 25 <i>Humidifier pad replacement</i> 	
<p>Our Platinum Service Plan Procedure Includes, As Needed:</p>	
<ol style="list-style-type: none"> 26 Remove and clean blower motor, drive mechanism and fan assembly. 27 <i>Adjust all dampers and set proper blower speed(s).</i> 28 Perform a complete and thorough, room-by-room, electronic carbon monoxide check of the entire house 29 Inspect and flush Hot Water Heater to keep free from debris and build up 30 <i>Conduct a complete Combustion Analyzer test on the heating system with report</i>
